

- aluminium
- asymmetric
- paperless system
- easy like 1-2-3

# Sydney

*Floating and avant-garde → SYDNEY looks as though it floats in front of the wall. With its one-sided wall fasteners in anodized aluminium and its asymmetrical shape with gently curved base panel, SYDNEY is a striking eye-catcher. The orientation system therefore becomes an impossible to overlook part of modern architectural concepts. The side clip profiles can be opened with just a single movement of the hand to enable the text inlay to be changed.*
