

Berlin

Well conceived and individual → The BERLIN system is notable for its exceptional versatility. The special mounting profiles in anodized aluminium can hold diverse sign formats in aluminium, stainless steel or acrylic glass in thicknesses of up to 20 mm. They therefore permit individual solutions for diverse areas of application to be realized with ease. In addition, the revolutionary technology on which the system is based allows the text panels to be updated quickly and easily.

Berlin

- aluminium
- can be combined individually
- many size alternatives
