

Clip-Trick Outdoor stands

The Clip-Trick stand offers complete flexibility. Both standard panels and full-length information panels can be used. The thickness of the material is dependent on the clamps used (6 or 12 mm).

The fasteners (clamps) are available in 16 colors as standard.

Clip-Trick outdoor stands can only accommodate information panels on one side.

Clip-Trick posts are always supplied in pairs with side posts extended by 500 mm or with optionally available plates. The posts can be painted in all standard colors F1 to F16 or in special colors. The post for the outdoor stands must be buried to a depth of at least 500mm in the ground.

The sign information is applied by applying self-adhesive foil lettering or digital printing directly to the glass.

To be able to produce the Clip-Trick stand we require a sketch of the proposed stand with the positions of the clamps marked.

Posts for outdoor stand	Art. No.	length in mm	
Round tubular post Ø 70 mm	i 78außen *	1500
