

Madrid Indoor stands

Madrid indoor stands are the ideal complement to the existing wall signs. They are flexible in terms of formats and are also portable. The sign information can be applied flexibly on both sides by means of graphic text or paper with fitted exchanger modules.

Technical data: The base panel is comprised of a 25 x 25 x 2 mm structural steel frame, with a 1.5 mm aluminum covering on both sides. For mobile applications we supply aluminium base plates (width of the stand x 1/5 of the stand height). For permanent installation we offer an optional steel plate (width of the stand x 250 x 10 mm) with four holes with diameters of 10.5 mm.

The stand and the base plate are supplied painted in RAL 9006 aluminium white as standard.

Art. No.: i 25aufstellerinnen		
Height of base panel in mm	width up to 500 mm	width up to 1000 mm
up to 1500		
up to 2000		
up to 2500		
up to 3000		

To be able to produce the Madrid sign we require a scale assembly drawing of the proposal. Please note that the door sign/directory must be capable of being opened towards the side or the top to enable the sign information to be changed.

Madrid Outdoor stands

Madrid outdoor stands round off a comprehensive range of designs. Flexible in terms of formats and suitable for applying sign information on both sides, they are the ideal solution for every conceivable requirement and provide the perfect welcome for every visitor.

Technical data: The base panel is comprised of a 40 x 40 x 3 mm stainless steel frame, with a 1.5 mm aluminum covering on both sides. The standard means of installation is on side posts lengthened by 500 mm. As an option we can also supply a galvanized steel base plate (stand width x 250 x 10 mm).

The stand and the base plate are supplied painted in RAL 9006 aluminium white as standard.
